

ABSTRACT**5 USE OF PHYSICAL MEDIA HAVING THE SAME POSITION –
 INDENTIFYING PATTERN IN DIGITAL DOCUMENTATION
 PRODUCTION**

A method of producing an electronic document using a plurality of pieces
of physical media having a common position location pattern marked
10 thereupon, comprising the steps of: (i) marking a first piece of the
physical media using a digital pen, said pen being arranged to acquire data
to enable the determination of the location of a tip thereof upon physical
media from the position location pattern marked thereupon; (ii) acquiring
data relating to strokes and the location of the strokes of the pen upon the
15 first piece of the physical media sequentially, and storing said data in a
memory ; (iii) acquiring data relating to strokes and the location of
the strokes of the pen upon a second piece of the physical media
sequentially, and storing said data in a memory; and (iv) arranging the data
stored in steps (ii) and (iii) to form at least one electronic document in
20 which the data relating to the first piece of physical media is
distinguishable from the data relating to the second piece of physical
media.

To be accompanied, when published, by Figure 3 of the drawings.
